

## Capability Statement

**Company Background** – Fire Alarm Control Systems, Inc. is a San Antonio based, CCR Registered, Small Business established in 1995 to provide systems and solutions to federal, commercial and educational facilities. Our mission is dedicated to providing the highest quality life safety and communication systems, unsurpassed service and training to our customers while instilling professionalism in our industry. Our primary NAICS codes are 238210 and 561621.

**Products and Services** - Fire Alarm Control Systems, Inc. has a team of factory trained and highly qualified personnel dedicated to see that your projects complete on-time. FACS provides a wide range of systems and services which allows us to provide the right solution for the right situation. Services and solutions include:

- Addressable and networked fire alarm and emergency communication systems
- Interior mass notification and distributed recipient solutions
- Exterior Giant Voice speaker arrays
- Wireless fire alarm and monitoring systems
- IP Based emergency communications and monitoring
- Public Address systems
- Design and CAD services for fire alarm, mass notifications, public address systems
- Test and Inspection services based on NFPA testing requirements
- Remote station monitoring services of fire alarm systems
- Intelligibility testing and reports
- Installation of systems upon request

**The FACS Difference** - Fire Alarm Control Systems, Inc. employs NICET Certified (Level IV, III and II) designers and technicians in the fire alarm system category; Texas State licensed planners and technicians; and technicians are factory trained on the systems they service and commission. FACS designers have extensive knowledge in local, state and federal design standards. We are also members of both national and local professional trade associations which allow us to keep abreast of changing trends in the industry. FACS can assist with design requirements ranging from the smallest commercial space to an entire campus networked systems, and can also provide its customers with system upgrade solutions which will allow the customer to be compliant with the rapidly changing fire and emergency communication codes.

**Summary** - Fire Alarm Control Systems, Inc. is committed to meeting and exceeding the expectations of its customers in providing the highest quality system, service and product solutions. Providing high end solutions at a realistic cost is our goal. Our team at FACS has the qualifications, relationships, design, and management expertise to fulfill this goal.
